

TEXAS STATE BOARD OF PLUMBING EXAMINERS

929 E 41ST ST, AUSTIN, TEXAS 78751 ▪ 512-936-5200 ▪ tsbpe.texas.gov

SAFETY POLICY

There are inherent hazards associated with portions of the examination that involve the use of basic plumbing hand tools and plumbing materials. The Texas State Board of Plumbing Examiners takes all reasonable precautions to prevent injuries that could occur during parts of the examination which require cutting, sawing, soldering, brazing, solvent welding and installing plumbing materials.

Each examinee will be provided with safety glasses for eye protection, gloves for hand protection and aprons. In addition to the minimal protection provided, each examinee must wear proper clothing that will protect against injury while taking the examination. This includes protecting and/or covering your head, stomach, feet, back and any other exposed portions of your body. Each examinee must exercise the same safety precautions during the examination that should be used to prevent injuries when preparing and installing plumbing materials on the job.

With your signature below, you are indicating that you understand this Safety Policy and will take all necessary precautions to prevent injury. However, if you have any questions regarding the proper safety precautions that should be taken during any project included in the examination, do not hesitate to ask any of the Board's Examiners for clarification at any time. **Shorts, open toed shoes, beachwear, cropped tops, tank tops, and flip flops are prohibited.**

Failure to abide by this policy may prevent you from taking an examination.
